

Santos Dumont

ENGLISH ASSESSMENT

Versão 25C

2.0

*Para pilotos de helicóptero ou
pilotos de helicóptero e avião*

ANAC

AGÊNCIA NACIONAL
DE AVIAÇÃO CIVIL

Identification

Welcome to the *Santos Dumont English Assessment*. Today is the ____ (Day as ordinal number e.g.: 4th) of ____ (Month), ____ (Year). I am *(name)*. *(SME: "And I am (name). Nice to meet you.")*.

- 1) Please tell me your full name.
- 2) Please sign here the same way you signed your ID. *(Ask candidate to sign the "Ficha de Solicitação de Serviço")*
- 3) May I see your pilot's license and your ID? **State ANAC'S CODE** *(Thank you)*
- 4) Do you have any electronic devices with you?
- 5) *(Look at the camera, please.) (Thank you)*

Part 1 – Aviation Topics

Ok, shall we start? Part One: "Aviation Topics". In this part, you will answer some questions related to aviation.

- 1) Why is the use of ICAO phraseology important?
(If "yes": How do pilots learn to use standard phraseology in English?)
- 2) How did you become interested in aviation?
(If necessary: Have you ever considered changing careers?)
- 3) When should a pilot perform a missed approach procedure?
(If necessary: How does a pilot prepare for a go-around procedure?)

Follow-up questions, if necessary: <i>Why? / Why not? / How? / When? / Where? / What?</i> <i>Can you say that again, please?</i> <i>Can you give an example/some examples?</i>	<i>Can you tell more about that?</i> <i>Can you explain it better?</i> <i>Have you ever been in/through this situation?</i> <i>Has it ever happened to you?</i>
---	---

Thank you. This is the end of part one. Let's move on to the second part of the test.

Please put the headset on. Let's check the volume.

 TRACK 1	<i>"Santos Dumont English Assessment: this is a sound check. Please confirm to the examiner if the volume is okay and you can hear the recording loud and clear."</i>
---	--

Part 2 – Interacting as a Pilot

Part Two: "Interacting as a Pilot". In this part, you will interact with the Air Traffic Control in five different situations. You may ask the controller to say again once. After listening to the controller, you should interact as the pilot. All information is important. You may take notes if you wish.

You are the pilot of a twin-engined wheeled aircraft. **Your call sign is ANAC 123.**

Wait 3 seconds for test taker to take notes if desired.

Are the instructions clear? OK, so let's start. Situation number one:

Situation 1) You have just landed at Ezeiza Airport in Buenos Aires. Visibility is poor. Listen to Ezeiza Ground Control and read back:

Wait for 3 seconds for test taker to take notes if necessary.

 TRACK 2	ANAC 123, [taxi via taxiways Hotel and Delta] [to gate ten]. [Cleared to cross runway one seven]. [Report vacated]. [4]
	Minimum interaction: <i>"Ground Control, ANAC 123. Taxi via H and D to gate 10. Cleared to cross runway 17. Report runway vacated, ANAC 123."</i>

<i>If the candidate did not interact with ATC as the pilot:</i> <i>You are supposed to interact as if you were the pilot.</i>	<i>If the candidate asks for a second repetition:</i> <i>You can only ask for one repetition.</i>
--	--

Now, while taxiing on taxiway Delta, you hit a fire truck and need to be towed to the hangar. Call Ground Control to explain the situation and request assistance.

Minimum interaction: <i>"We have hit a fire truck. We need to be towed to the hangar. Request assistance, ANAC 123."</i>	
 TRACK 3	ANAC 123, I understand you had a collision with a truck and [your helicopter is on fire]. Confirm? [Assistance is on the way]. [2]
	Minimum interaction: <i>"NEGATIVE, Ground. We are not on fire. We have collided with a fire truck, we need to be towed to the hangar, ANAC 123."</i>

What did the controller say? **Wait for interaction.**

Thank you. This is the end of situation number 1. Now, situation number 2.

Situation 2) You are going to land at Gold Coast Airport. Listen to Brisbane Approach and read back.

Wait for 3 seconds for test taker to take notes if desired.

 TRACK 4	ANAC 123, Brisbane Approach, [descend to flight level one four zero], [turn right] [heading one six zero], [expect one zero minute hold] at [Charlie Golf VOR]. [5]
	Minimum interaction: <i>"Descend to flight level 140, right turn heading 160, expecting 10 minute hold at CG VOR, ANAC 123."</i>

If the candidate did not interact with ATC as the pilot: You are supposed to interact as if you were the pilot.	If the candidate asks for a second repetition: You can only ask for one repetition.
---	---

Now, you notice that your left engine oil temperature has increased beyond limits so you had to shut it down. Contact Brisbane Approach to report your problem and say your intentions.

Minimum interaction: <i>"Brisbane Control, ANAC 123, we have high oil temperature in our left engine. We are shutting it down (+ intentions)."</i>	
	ANAC 123, fly direct to Charlie Golf VOR and [expect direct approach to runway one four]. I understand you shut one of your engines down due to high oil temperature. Confirm? [1]
TRACK 5	Minimum interaction: <i>"AFFIRM. I shut my engine down. Fly direct to CG VOR and expect direct approach to runway 14, ANAC 123."</i>

What did the controller say? **Wait for interaction.**

Thank you. This is the end of situation number 2. Now, situation number 3.

Situation 3) You are approaching Galeao Airport. Listen to Rio Approach and read back.

Wait for 3 seconds for test taker to take notes if desired.

 TRACK 6	ANAC 123, Rio Approach. [Descend to five thousand feet], and [turn left] [heading two seven zero degrees]. Adjust [speed to one one zero knots]. [4] Minimum interaction: <i>"Rio Approach, descend to 5,000 feet, turn left 270, speed 110 knots, ANAC 123."</i>
---	---

If the candidate did not interact with ATC as the pilot: You are supposed to interact as if you were the pilot.	If the candidate asks for a second repetition: You can only ask for one repetition.
--	--

Now, you notice some mountains ahead of you and suspect that the ATC has forgotten about you. Call Rio Approach, explain the situation and ask for new vectors to Galeao.

Minimum interaction: <i>"Rio Approach, this is ANAC 123, I see mountains ahead of me. Request vectors to Galeao."</i>	
 TRACK 7	ANAC 123, [turn right] [heading one zero zero degrees]. [Do you intend to divert to Santos Dumont Airport]? [3] Minimum interaction: <i>"NEGATIVE, we intend to land at Galeao Airport. Turn right heading 100 degrees, ANAC 123."</i>

What did the controller say? **Wait for interaction**

Thank you. This is the end of situation number 3. Now, situation number 4.

Situation 4) You are going to land at Guararapes Airport. Listen to Recife Tower and read back.

Wait 3 seconds for test taker to take notes if desired.

 TRACK 8	ANAC 123, [continue your approach] to [runway one eight] followed by [circling to runway three six]. [Report downwind leg]. [4]
	Minimum interaction: <i>"Continue approach runway 18, followed by circling to runway 36. Report downwind leg, ANAC 123."</i>
If the candidate did not interact with ATC as the pilot: You are supposed to interact as if you were the pilot.	If the candidate asks for a second repetition: You can only ask for one repetition.

Now, you are cleared to land and this situation happens to you (**show the picture to the test taker**). Call Recife Tower to report the situation and say your intentions.

Minimum interaction: <i>"Recife Tower, there is a truck on the runway. Missed approach/we are going around, ANAC 123."</i>	
 TRACK 9	ANAC 123, [turn left] [report downwind] leg runway three six. [Are you going around because your main gear is stuck]? Confirm. [3]
	Minimum interaction: <i>"NEGATIVE. We are going around because there is a truck on the runway / because of a runway incursion. Turn left. Report downwind leg runway 36, ANAC 123."</i>

What did the controller say? **Wait for interaction**

Thank you. This is the end of situation number 4. Now, situation number 5.

Situation 5) You are approaching Santiago Airport. Listen to Santiago Approach and read back.

Wait 3 seconds for the test taker to take notes if necessary.

	ANAC 123, radar contact, [turn right] [heading three four zero], [descend to five thousand feet], [report passing nine thousand feet], and [expect ILS runway one seven left]. [5]
TRACK 10	Minimum interaction: <i>"Santiago Approach, roger, turn right heading 340, descend to 5,000ft, report passing 9,000ft, and expect ILS runway 17L, ANAC 123."</i>

If the candidate did not interact with ATC as the pilot: You are supposed to interact as if you were the pilot.	If the candidate asks for a second repetition: You can only ask for one repetition.
--	--

Now, during approach you see this right ahead of you (**show the picture to the candidate**). Call Santiago Approach to report the situation and request deviation.

Minimum interaction: <i>"Santiago Approach, there is a hot air balloon ahead of us. Request deviation, ANAC 123."</i>	
	ANAC 123, [turn two zero degrees left]. [Confirm the hot air balloon is at your twelve o'clock position]. [2]
TRACK 11	Minimum interaction: <i>"AFFIRM. The hot air balloon is at our twelve o'clock position. Turn 20 degrees left, ANAC 123."</i>

What did the controller say? **Wait for interaction**

Thank you. This is the end of part two. Let's move on to the third part of the test.

Part 3 – Unexpected Situations

Part Three: “Unexpected Situations”. In this part of the test, you will listen to three different communications between pilots and air traffic controllers.

The recordings will be played twice. There is a five-second pause before the recording is repeated. After listening to the recording, you should tell me everything that the pilot and the controller said. I will then ask you a question.

At the end of Part three, I will ask you to compare the three situations, so please take notes. **All information is important. Do you have any questions?**

Situation 1) Listen to situation number one:

 TRACK 12	Pilot: Mayday, Mayday, Mayday, London Approach, PR-AJR, we have [fire in the cargo hold], [we are descending to two thousand feet]. [Request emergency landing] [straight-in approach] at Heathrow. [We have five hundred liters remaining fuel]. [5]
	ATC: PR-AJR, London Approach, roger. [Descend at your discretion]. [Firefighters will be called upon]. When able, [report persons on board]. [3]

(If necessary: tell me everything you heard, please).

Wait for interaction.

1) What actions should a pilot take when there is fire onboard?

(If necessary: What can cause fire in the cargo hold?)

Situation 2) Listen to situation number two:

 TRACK 13	Pilot: Phoenix Approach, looks like we're gonna be [returning to the airport]. We've got an [airspeed indicator failure] that we're gonna need to check, PT-FIJ. [2]
	ATC: PT-FIJ, roger. [Descend to one zero thousand], [altimeter setting two niner niner two], [expect vectors to ILS runway zero seven left]. [3]

(If necessary: tell me everything you heard, please).

Wait for interaction.

2) How dangerous is it when a pilot doesn't know his correct airspeed?

(If necessary: How can a pilot identify an airspeed indicator failure during the flight?)

Situation 3) Listen to situation number three:

 TRACK 14	Pilot: Pan Pan, Pan Pan, Pan Pan, Brasilia Control, PR-OMA. [Tail rotor control failure]. [1]
	ATC: PR-OMA, roger. Say your intentions.
	Pilot: [Request an available runway] [for running landing], PR-OMA. [2]
	ATC: PR-OMA, [proceed to Brasília Airport]. [Expect runway two niner right]. [Say your estimated time of arrival]. [3]
	Pilot: [ETA twelve thirty], PR-OMA. [1]

(If necessary: tell me everything you heard, please).

Wait for interaction.

3) What could cause a tail rotor failure?

(If necessary: How do helicopter pilots deal with tail rotor failure?)

Thank you! You may remove the headset now.

Make sure the microphone is close to the candidate.

Now, after listening to these three situations:

4) How would you compare them, which one do you think is the most difficult to deal with and why? You may want to compare them in terms of severity, possible solutions or ways of prevention.

Follow-up questions, if necessary:

Why? / Why not? / How? / When? / Where? / What?

Can you say that again, please?

Can you give an example/some examples?

Can you tell more about that?

Can you explain it better?

Have you ever been in/through this situation?

Has it ever happened to you?

Thank you! This is the end of part three. Let's now move on to the last part of the test, part four.

Collect all notes made by the test taker and eliminate them.

Part 4 – Picture Description and Discussion

Part 4: Picture Description and Discussion. In this part, you will tell me what you can see in this picture (**show the picture to the test taker**) and what you think is happening in it. After that, I will ask you some questions. (**Pause**) Look at the picture carefully. You may take a few moments to think before you start talking.

1	Please describe this picture to me. <i>If necessary: - What's happening in this picture?</i>
2	Choose one: What do you think happened before this picture was taken?; or What do you think was happening before this picture was taken? Can you create a short story based on this picture? Use your imagination.
3	Now imagine that this picture has just been taken: What do you think will happen next?
	Only for more proficient candidates / Choose one: Has a situation like this ever happened to you or somebody you know? Please tell me about it. If you faced a similar situation during takeoff, would you return to the airport? Why?/Why not? Do you think you would handle a real emergency situation in the same way as in the simulator?

Picture A:

Picture B:

Picture C:

Picture D:

4) What might happen if a bird strikes a helicopter windshield right after takeoff?

Ask the following question if candidate asks for clarification:

What may happen if a bird hits the windshield of a helicopter after takeoff?

5) How do airports mitigate the risk of bird strikes?

Ask the following question if candidate asks for clarification:

What do airports do to avoid bird strikes?

6) Now, I am going to read a statement to you and you will tell me to what extent you agree or disagree with it.

“Bird strikes are a bigger problem today than thirty years ago because of new environmental laws, which have caused an increase in the number and size of protected wildlife areas and, also, in the number of birds.”

Ask the following question if candidate asks for clarification:

How much do you agree or disagree with the following statement?

“Bird strikes are a bigger problem today than in the past because there are more birds now than there used to be thirty years ago.”

Possible follow-up questions to be asked if necessary:

Why? / Why not? / How? / When? / Where? / What?

Can you say that again, please?

Can you give an example/some examples?

Can you tell more about that?

Can you explain it better?

Have you ever been in/through this situation?

Has it ever happened to you?

Ok, thank you! So this is the end of the test. Thank you very much for coming.
