

Santos Dumont

ENGLISH ASSESSMENT

Versão 26C

2.0

*Para pilotos de helicóptero ou
pilotos de helicóptero e avião*

ANAC

AGÊNCIA NACIONAL
DE AVIAÇÃO CIVIL

Identification

Welcome to the *Santos Dumont English Assessment*. Today is the ____ (Day as ordinal number e.g.: 4th) of ____ (Month), ____ (Year). I am *(name)*. *(SME: "And I am (name). Nice to meet you.")*.

- 1) Please tell me your full name.
 - 2) Please sign here the same way you signed your ID. *(Ask candidate to sign the "Ficha de Solicitação de Serviço")*
 - 3) May I see your pilot's license and your ID? **State ANAC'S CODE** *(Thank you)*
 - 4) Do you have any electronic devices with you?
 - 5) *(Look at the camera, please.) (Thank you)*
-

Part 1 – Aviation Topics

Ok, shall we start? Part One: "Aviation Topics". In this part, you will answer some questions related to aviation.

- 1) How does a flight simulator help a pilot train for emergencies?
(If necessary: Are there emergency situations that cannot be replicated in simulators? Which ones?)
- 2) What were the best pieces of advice that your flight instructor gave you?
(If necessary: What makes a great flight instructor in your opinion?)
- 3) How do you think Brazilian aviation will change in the near future?
(If necessary: What (else) do you think needs to be improved?)

Follow-up questions, if necessary: Why? / Why not? / How? / When? / Where? / What? Can you say that again, please? Can you give an example/some examples?	Can you tell more about that? Can you explain it better? Have you ever been in/through this situation? Has it ever happened to you?
--	--

Thank you. This is the end of part one. Let's move on to the second part of the test.

Please put the headset on. Let's check the volume.

 TRACK 1	<i>"Santos Dumont English Assessment: this is a sound check. Please confirm to the examiner if the volume is okay and you can hear the recording loud and clear."</i>
---	--

Part 2 – Interacting as a Pilot

Part Two: "Interacting as a Pilot". In this part, you will interact with the Air Traffic Control in five different situations. You may ask the controller to say again once. After listening to the controller, you should interact as the pilot. All information is important. You may take notes if you wish.

You are the pilot of a twin-engined wheeled aircraft. **Your call sign is ANAC 123.**

Wait 3 seconds for test taker to take notes if desired.

Are the instructions clear? OK, so let's start. Situation number one:

Situation 1) You are approaching Dubai Airport. Listen to Dubai Approach Control and read back.

Wait for 3 seconds for test taker to take notes if necessary.

 TRACK 2	ANAC 123, [cleared (Miada One) Arrival]. [Descend and maintain four thousand feet]. [Report passing six thousand]. [QNH one zero one three]. Caution, birds in the vicinity of the airport. [4]
	Minimum interaction: <i>"Cleared Arrival. Descend and maintain 4,000ft. Report passing 6,000(ft). QNH 1013, ANAC 123."</i>

<i>If the candidate did not interact with ATC as the pilot:</i> <i>You are supposed to interact as if you were the pilot.</i>	<i>If the candidate asks for a second repetition:</i> <i>You can only ask for one repetition.</i>
--	--

Imagine you have lost your left your hydraulic system. You will need to use the emergency hydraulic system to lower your landing gear. Call Dubai Approach to inform them about your situation and say your intentions.

Minimum interaction: <i>"During descent we lost our left hydraulic system. We will need to use the emergency hydraulic system to lower the landing gear, ANAC 123."</i>	
 TRACK 3	ANAC 123, [descend to two thousand feet] and [say your indicated airspeed]. [Do you have a problem with your autopilot]? Confirm. [3]
	Minimum interaction: <i>"NEGATIVE. We had hydraulic failure. Descending to 2,000ft. (Speed), ANAC 123."</i>

What did the controller say? **Wait for interaction.**

Thank you. This is the end of situation number 1. Now, situation number 2.

Situation 2) You are at Vitoria Airport. Listen to Vitoria Tower and read back.

Wait for 3 seconds for test taker to take notes if desired.

	ANAC 123, [cleared to backtrack], line up and wait [runway two four]. [Report ready for takeoff]. [3]
TRACK 4	Minimum interaction: <i>"Cleared to backtrack, line up and wait, runway 24, report ready for takeoff, ANAC 123"</i>

If the candidate did not interact with ATC as the pilot: You are supposed to interact as if you were the pilot.	If the candidate asks for a second repetition: You can only ask for one repetition.
--	--

Now, a flight attendant tells you that an unaccompanied minor has passed out. Call Vitoria Tower to report the situation and request assistance.

Minimum interaction: <i>"Tower, ANAC 123, an unaccompanied minor has fainted/passed out. Request assistance."</i>	
	ANAC 123, [vacate the runway at taxiway Bravo] and [hold]. [An ambulance will be sent straight away]. [I understand the first officer has fainted]. Confirm? [4]
TRACK 5	Minimum interaction: <i>"NEGATIVE. A minor has fainted/passed out, ANAC 123."</i>

What did the controller say? **Wait for interaction.**

Thank you. This is the end of situation number 2. Now, situation number 3.

Situation 3) You are going to land at Toronto Airport. Listen to Toronto Arrival Control and read back.

Wait for 3 seconds for test taker to take notes if necessary.

 TRACK 6	ANAC 123, Toronto Arrival Control. [Expect visual approach], [runway zero five]. [Descend to five thousand feet]. [3]
	Minimum interaction: "Toronto Arrival, expect visual approach, runway 05, descend to 5,000 feet, ANAC 123."

<i>If the candidate did not interact with ATC as the pilot:</i> <i>You are supposed to interact as if you were the pilot.</i>	<i>If the candidate asks for a second repetition:</i> <i>You can only ask for one repetition.</i>
--	--

Now, the ATIS informs there is work in progress on several taxiways. Call Toronto Arrival to request to land on runway one five left, which is closest to your company's gates.

Minimum interaction: "Toronto Arrival, request landing on runway 15L, ANAC 123."	
 TRACK 7	ANAC 123, [stop your descent at six thousand feet] and [reduce speed to eight zero knots]. [Are you requesting to land on runway one five left]? Confirm. [3]
	Minimum interaction: "AFFIRM, request landing on runway 15L. Stop descent at six thousand feet and reduce speed to 80kts, ANAC 123."

What did the controller say? **Wait for interaction.**

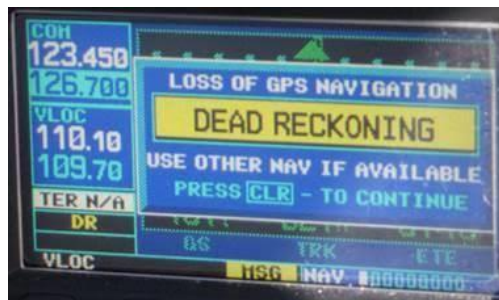

Thank you. This is the end of situation number 3. Now, situation number 4.

Situation 4) You have just taken off from Miami Airport using RNAV. Listen to Miami Tower and read back.

Wait 3 seconds for test taker to take notes if desired.

 TRACK 8	ANAC 123, [climb and maintain five thousand feet], [squawk three four three two], and [proceed to Fox Lima Lima VORTAC]. Call Miami Departure on frequency [one one nine point four five]. [4] Minimum interaction: "Climb and maintain 5,000ft, squawk 3432, proceed to FLL VORTAC. Call Miami Departure on 119.45, ANAC 123."
If the candidate did not interact with ATC as the pilot: You are supposed to interact as if you were the pilot.	If the candidate asks for a second repetition: You can only ask for one repetition.

Now, this situation happens to you (**show the picture to the test taker**). Call Miami Tower to inform them about your problem.

Minimum interaction: "Miami Tower, we lost our GPS, ANAC 123."	
 TRACK 9	ANAC 123, your transmission is readable but with difficulty. [I understand you are having problems with your GPWS]. Is that it? [How do you read me]? [2] Minimum interaction: "NEGATIVE. We are having problems with our GPS. Readability XX, ANAC 123."

What did the controller say? **Wait for interaction**

Thank you. This is the end of situation number 4. Now, situation number 5.

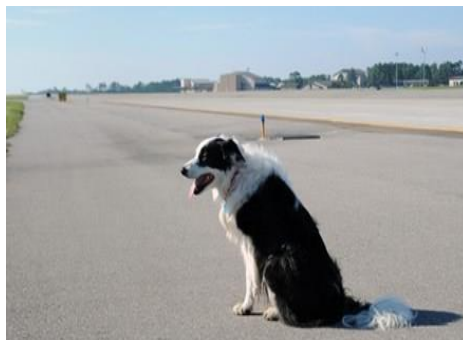

Situation 5) You are at Salvador Airport. Listen to Salvador Ground and read back.

Wait 3 seconds for the test taker to take notes if necessary.

 TRACK 10	ANAC 123, approved [taxi to holding point runway one zero], via [taxiways Juliet and Bravo], [follow Cessna Citation ahead of you], approaching holding point contact Tower on frequency [one one eight decimal six zero]. [4] Minimum interaction: “Salvador Ground, taxi to holding point runway 10, via taxiways J and B. Follow CITATION. Approaching holding point will contact tower on 118.60, ANAC 123.”
--	--

If the candidate did not interact with ATC as the pilot: You are supposed to interact as if you were the pilot.	If the candidate asks for a second repetition: You can only ask for one repetition.
--	--

Now, while taxiing on taxiway Bravo, you see this (**show the picture to the candidate**). Call Salvador Ground to report the situation.

Minimum interaction: “Salvador Ground, ANAC 123. There is a loose dog close to/by/on the taxiway Bravo.”	
 TRACK 11	ANAC 123, [hold position]. [Confirm there is a dog by taxiway Bravo]. [Ground staff is on the way]. [3] Minimum interaction: “AFFIRM, there is a loose dog close to /by/ on the taxiway. Hold position ANAC 123.”

What did the controller say? **Wait for interaction**

Thank you. This is the end of part two. Let’s move on to the third part of the test.

Part 3 – Unexpected Situations

Part Three: “Unexpected Situations”. In this part of the test, you will listen to three different communications between pilots and air traffic controllers.

The recordings will be played twice. There is a five-second pause before the recording is repeated. After listening to the recording, you should tell me everything that the pilot and the controller said. I will then ask you a question.

At the end of Part three, I will ask you to compare the three situations, so please take notes. **All information is important. Do you have any questions?**

Situation 1) Listen to situation number one:

 TRACK 12	ATC: PR-AEA, Washington Center. [Turn left] [heading one eight zero]. The [area ahead is restricted] [due to military activity]. [4]
	Pilot: Washington Center, PR-AEA. [Unable to comply] [due to a severe thunderstorm] [at our nine o'clock position]. [3]

(If necessary: tell me everything you heard, please).

Wait for interaction.

1) Under what circumstances can ATC instructions be disregarded by pilots?

(If necessary: What should an air traffic controller do if a pilot is unable to comply with an ATC instruction?)

Situation 2) Listen to situation number two:

 TRACK 13	Pilot: Frankfurt Center, PT-ILD. We have [flight control problems] due to [hydraulic pressure drop]. [Request emergency landing] at Frankfurt Airport. [3]
	ATC: PT-ILD, Frankfurt Center. [Descend at your discretion] [until three thousand feet]. [Runway two five right is available]. [Do you need any special assistance]? [4]

(If necessary: tell me everything you heard, please).

Wait for interaction.

2) In case of hydraulic failure, is it better to perform a rolling landing or hover? Why?

(If necessary: What are the consequences of a hydraulic pressure drop?)

Situation 3) Listen to situation number three:

 TRACK 14	Pilot: Pan Pan, Pan Pan, Pan Pan, Brasilia Center, PT-OHA. [Performing immediate landing] at present position due to [transmission oil loss]. [2]
	ATC: OHA, Brasilia Center, [say your position] and [your landing site]. [2]
	Pilot: Brasilia Center, [we intend to land at a farm] [northeast of Araguari]. [2]

(If necessary: tell me everything you heard, please).

Wait for interaction.

3) How dangerous is it to fly a helicopter that has lost transmission oil? Why?

(If necessary: What can be done to avoid having a transmission oil loss?)

Thank you! You may remove the headset now.

Make sure the microphone is close to the candidate.

Now, after listening to these three situations:

4) How would you compare them, which one do you think is the most difficult to deal with and why? You may want to compare them in terms of severity, possible solutions or ways of prevention.

Follow-up questions, if necessary:

Why? / Why not? / How? / When? / Where? / What?
 Can you say that again, please?
 Can you give an example/some examples?
 Can you tell more about that?
 Can you explain it better?
 Have you ever been in/through this situation?
 Has it ever happened to you?

Thank you! This is the end of part three. Let's now move on to the last part of the test, part four.

Collect all notes made by the test taker and eliminate them.

Part 4 – Picture Description and Discussion

Part 4: Picture Description and Discussion. In this part, you will tell me what you can see in this picture (**show the picture to the test taker**) and what you think is happening in it. After that, I will ask you some questions. (**Pause**) Look at the picture carefully. You may take a few moments to think before you start talking.

1	Please describe this picture to me. <i>If necessary:</i> - What's happening in this picture?
2	Choose one: What do you think happened before this picture was taken?; or What do you think he/she/they/these people was/were doing before this picture was taken? What do you think was happening before this picture was taken? Can you create a short story based on this picture? Use your imagination.
3	Now imagine that this picture has just been taken: What do you think will happen next?
	Only for more proficient candidates / Choose one: Do you think you would handle a real emergency situation in the same way as in the simulator?

Picture A:

Picture B:

Picture C:

Picture D:

4) What safety rules should be observed during the passenger boarding process?

Ask the following question if candidate asks for clarification:

What rules should be followed during the passenger boarding process?

5) What (else) could be done to avoid incidents during passenger boarding?

Ask the following question if candidate asks for clarification:

What measures could be taken to avoid problems during passenger boarding?

6) Now, I am going to read a statement to you and you will tell me to what extent you agree or disagree with it.

“Although pilots are responsible for the safety of the passengers, if a passenger is injured during boarding, he or she may also be held accountable for it, depending on the situation.”

Ask the following question if candidate asks for clarification:

How much do you agree or disagree with the following statement?

“Although pilots are responsible for passenger safety, if a passenger is injured during boarding, he or she may also be to blame, depending on the situation.”

Possible follow-up questions to be asked if necessary:

Why? / Why not? / How? / When? / Where? / What?

Can you say that again, please?

Can you give an example/some examples?

Can you tell more about that?

Can you explain it better?

Have you ever been in/through this situation?

Has it ever happened to you?

Ok, thank you! So this is the end of the test. Thank you very much for coming.
